Summary

Dedicated and highly skilled programmer with years of experience in software development. Proficient in multiple programming languages and technologies, with a strong ability to analyze complex problems and create innovative solutions. Adept at collaborating with cross-functional teams to deliver high-quality software products on time and within budget.
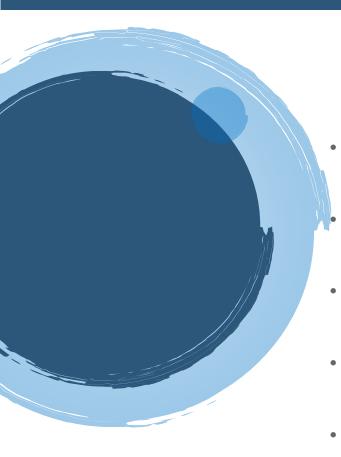

Professional Experience

UI/UX & Computer Programmer II - DSWD FO VII | February 2025 - Present

- Build and optimize microservices applications using Laravel and VueJS for seamless performance and scalability

- Create wireframes and interactive prototypes for client-facing applications using Figma to enhance user experience and design clarity

- Conduct initial feature and unit testing using PHPUnit to ensure code quality and functionality

Computer Programmer II - DSWD FO VII | September 2024 – December 2025

- Build and optimize microservices applications using Laravel and VueJS for seamless performance and scalability

- Conduct initial feature and unit testing using PHPUnit to ensure code quality and functionality

Programmer II -RuralNet INC | September 2021 - September 2024

- Support senior developers in coding, testing, and debugging software to enhance performance and reliability.

- Created and managed comprehensive documentation for software projects, including user manuals and technical specifications, to ensure clarity and usability

- Engaged in Agile sprint planning and retrospective meetings, actively contributing to the iterative development process and continuous improvement.

- Develop robust and scalable APIs using Spring Boot and Laravel to enhance application performance and integration

- Assist QA and Full Stack Lead in testing, debugging, and optimizing applications to ensure high performance and reliability

- Manage code migration across environments (local, demo, staging, production) to ensure smooth deployment and system stability

- Set up and configure web servers like Apache, Tomcat, and Nginx, as well as containerized environments using Docker on Ubuntu/Linux servers for optimal performance and scalability

Education

Bachelor of Science in Information Technology | Cebu Eastern College | 2021

Skills

Programming Languages
- JAVA, PHP
- REACTJS, VUE JS, VUE JS, TYPESCRIPT
- HTML, CSS
- TAILWIND CSS, BOOTSTRAP, SASS,
- LARAVEL, SPRING BOOT

Database Management

- MSSQL, MYSQL, POSTGRE

Version Control
- GIT

Problem-Solving
- Strong analytical and problem-solving skills

Content Management System
- Wordpress

Agile Methodologies
- JIRA

Testing and Debugging
- Expertise in debugging and unit testing

Server
- Linux/Ubuntu

Web Servers
- Nginx

- Apache

- Apache Tomcat
